**CROSS-COUNTRY JUMP BOOK CALCULATION**

Each book contains 5 pages, 12 horses per page – 60 horses per book. In order to calculate the number of books required, divide the number of competitors (per level) by 60, then multiply by the number of XC obstacles.

Example: 50 Training riders ÷ 60 = .83 (round up to 1 Book).  
 1 book x 18 jumps = 18 books; 135 Novice riders ÷ 60 = 2.25 (round up to 3 Books).  
 3 books x 14 jumps = 42 Books. Total: 18 + 42 = 60.

**ORDER POLICY FOR DRESSAGE TESTS: USEF DRESSAGE TESTS FOR EVENTING ARE COPYRIGHTED AND BY LAW CANNOT BE PHOTOCOPIED! All tests must be ordered in packs, ten (10) sheets per pack. No individual test will be sold or faxed, no exceptions.**
