CROSS-COUNTRY JUMP BOOK CALCULATION

Each book contains 5 pages, 12 horses per page – 60 horses per book. In order to calculate the number of books required, divide the number of competitors (per level) by 60, then multiply by the number of XC obstacles.

Example: 50 Training riders ÷ 60 = .83 (round up to 1 Book).
1 book x 18 jumps = 18 books; 135 Novice riders ÷ 60 = 2.25 (round up to 3 Books).
3 books x 14 jumps = 42 Books. Total: 18 + 42 = 60.

**Effective June 2018, All 2018 USEF dressage tests will be available on the USEA web store at www.shopusea.com.
The USEA will deliver all dressage tests in a digital format. Please provide a valid email address with your order.**
